Technology Systems Acceptable Use Policy and Use Agreement for Students

The Fowlerville Community School district offers technology equipment and Internet access for student and staff use. This document is the Acceptable Use Policy for your use of these systems and for any technology equipment on or off District premises or at District events. Fowlerville's technology systems have been established for limited educational purposes to include classroom activities, career development, and high quality self-discovery activities, all of which promote educational excellence.

FCS technologies have not been established as a public access or public forum and our school district has the right to place reasonable restrictions on the material you access or post, the training you need to have before you are allowed to use the system, and enforce all rules set forth in the Fowlerville Community School's code and the laws of the state of Michigan. Further, you may not use these systems for commercial purposes to offer, provide, or purchase products or services through the systems or use them for political lobbying. Access to the Internet is available through this school district only with permission of the principal or his/her designee and your parents/ legal guardian. Fowlerville Community School district is in compliance with the **Child Internet Protection Act (CIPA)**.

Pursuant to Federal law, the FCS Board of Education has implemented technology protection measures which block/filter Internet access to visual displays that are obscene, child pornography, or other displays deemed harmful to minors. The Board utilizes software and/or hardware to monitor online activity of students and staff members to restrict access to child pornography and other material that is obscene, objectionable, inappropriate and/or harmful to minors. Nevertheless, parents/guardians are advised that a determined user may be able to gain access to services on the Internet that the Board has not authorized for educational purposes. In fact, it is impossible to guarantee students will not gain access through the Internet to information and communications that they and/or their parents/guardians may find inappropriate, offensive, objectionable or controversial. Parents/Guardians assume risks by consenting to allow their child to participate in the use of the Internet. Parents/Guardians of minors are responsible for setting and conveying the standards that their children should follow when using the Internet.

The signatures on the policy summary indicate the parties who signed have read the terms and conditions carefully and understand their significance and agree to abide by them.
